An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

In claim 29, line 2, replace "powd r" with -powder--.

This amendment corrects only an obvious typographical error and does not materially affect the scope or meaning of the claims.

The following is an examiner's statement of reasons for allowance: The prior art of record fails to teach or suggest the combination of a resistor (as defined in the refractory repair art) component, hard bituminous component, metal powder and mineral oil; or the improved repairs possible therewith. Claims 20, 21-25 and 28 recite properties of the composition of claim 18 which make it especially suitable for refractory repair. While broad, these claims are not indefinite (see, *In re Miller*, 169 USPQ 597) in that they positively limit certain components to those having specific properties (such as self-ignition temperature) at conditions suitable for refractory repair (e.g. excluding extreme temperatures unsuitable for refractory repair).

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to David M. Brunsman whose telephone number is 571-272-1365. The examiner can normally be reached on M, W, F, Sa; 6:00-4:30.
